

# WHY BITQ PROFESSIONAL SERVICES?

BITQ are changing the **Professional Services** dynamic by combining financial acumen, business insights and enhanced data strategies. The result leads to real time, accurate financial assurance to executives and boards as well as the tools that aid and accelerate strategic executive decision making.

*Enabling insights for a better future*

# HOW DOES BITQ PROFESSIONAL SERVICES HELP?

## **Business and Finance Strategy**

The design and implementation of tailored, industry specific organisational and financial strategy and advice. A strategy includes a comprehensive strategic plan, an appropriate financial governance framework, effective and efficient business and finance processes, systems that suit the maturity of the organisation, and an objective view on the capacity and capability of resources within the organisation.

## **Financial Reporting, Budgeting and Forecasting Automation**

The ability to use well-formed financial data and to play it back to stakeholders in an easily digested format, using technology and real-time dashboarding to assist in answering critical business questions. Automation reduces the need for human intervention, therefore de-risking the reporting environment, maximising efficiency and accelerating financial independence.

## **Financial Assessment and Sustainability**

Sustainability of a business has not been more relevant than now. Buzzwords of recent times include "Finance transformation", "Recession proof", "Industry 4.0" – all these reflect how quickly the world changes, how businesses need to be agile and be able to adjust to change instantaneously. Technology, machine learning, AI and automation will be key to the sustainability and existence of organisations in future. Combining senior financial experience and a 'best of breed' data strategy will not only future proof an organisation, it will also enable executives to draw insights from their data which was not easily available or evident. Future proofing the organisation goes hand in hand with mitigating material risks.

## **Finance Support and Assurance**

Finance capacity, or capability, is often challenging for organisations. We are well positioned to provide highly skilled individuals to support a short-term need, or provide a longer-term capability. As experts in our field, with significant experience serving some of the most prominent brands and departments in Australia and globally, our team is focussed on delivering solutions from C-suite executives to analysts supporting a business' financial function. This support is underpinned by the assurance of our brand, and the experience of our executives who lead these engagements.

# THE BITQ WAY

BITQ have a tried and tested methodology that ensures we gain utmost clarity around your challenges and needs before looking at bespoke ways that can match each team and or organisation.

## Evaluation

Explore deeper into your existing finance function, governance processes, current state analysis and process overviews, staffing capacity, staffing capability and the systems in place.

## Implementation

Working with you to implement the right solution for your needs, and testing that the new solution is achieving the desired outcomes, behaviours or financial impacts.

## Client Workshop

Understanding the business, the finance function, your people, challenges and opportunities.

## Solution Design

Working with you to design a detailed roadmap to drive the desired outcomes, helping future proof your business and minimise risks.
