

Why Us?

BiTQ – Making Data Useful

As an award-winning supplier of bespoke business intelligence and data analytics services, BiTQ is recognised as a global leader in the delivery of tailored solutions designed to improve business processes from the ground up.

Our organisation is committed to maximising the value of client data through transformation, cleansing, migration, automation, and futureproofing.

BiTQ's areas of expertise include:

- Data Engineering
- Data Reporting & Analytics, including BI & Data Governance
- Data Science, with a strong focus on Machine Learning
- Data Security
- Software as a Service (SaaS) development, for bespoke applications

Why BiTQ?

- ✓ Award-winning local supplier
- ✓ Smarter, customer-centric solutions designed to maximise the value of data
- ✓ Cost-effective and futureproof
- ✓ Large enough to deliver and small enough to care
- ✓ Experienced data specialists with real data & analytics expertise

Our approach comprises a four-stage methodology built around partnering with customers to deliver intelligent solutions customised to suit their needs and goals.

Doing so allows us to transform data into valuable, actionable insights through business intelligence processes that apply data analysis techniques to support streamlined decision-making.

What We Offer

On-Site Evaluation System

Draw on our team's extensive expertise to explore your existing data ecosystems, organisational data goals, staffing capabilities and related partners. Let us identify where the gaps lie and how our solutions can unleash your full potential.

Strategy Development

BiTO adopts a customer-centric approach to service delivery whereby we invest time and resources in creating a detailed roadmap to making your data useful. There is no solution in a box and BiTO's methodology supports customers on their journey from development through to implementation.

Strategy Implementation

Once we've decided on a strategy, BiTO works closely with your team to organise, visualise and analyse your data, ensuring we implement the right solution for your needs before concluding with a detailed project evaluation.

Customer Training & Workshops

BiTO offers multiday workshops in which we seek to understand the challenges faced by your team and implement an appropriate analytics solution. We offer Power BI Foundation training and mentorship along with a full delivery team, ensuring you fast-track your staff's expertise.

Data Engineering

BiTO is renowned for designing and implementing 'best of breed' data architecture, data governance and data security principles backed by a comprehensive data literacy program to unleash the full potential of your business and its employees.

Data Reporting & Analytics

Extract real meaning from your data through robust Power BI designed to tell the story of your business. Our tools give you quick and easy access to valuable information that enables you to make more informed decisions faster.

Data Governance

Ensure the availability, usability, consistency, integrity, and security of your data by implementing internal data standards and policies to oversee the people, processes and technologies involved in managing your operations.

Data Science

Unify statistics, data analysis and machine learning to understand actual phenomena as they occur across your operations.

Data Security

BiTO has a range of solutions designed to ensure your data is protected from unauthorised access, use, change, disclosure or destruction.

Software as a Service (SaaS)

Free yourself from complex software and hardware management through tailored SaaS solutions designed to improve the agility of your business.
