Solve challenges via call centre sentiment analysis, insights, and performance analytics

ABOUT BITQ:

At BiTQ, our mission is to help businesses make their data useful. Imagine a world where you can make smarter, faster, better business decisions that enable you to concentrate on maximising your services for the benefit of your clients.

What differentiates our offer

BiTQ's product is a functional solution for sentiment analysis powered by Azure. Our differentiator is that this is not a black box. Instead, our solution can be tailored to your specific business needs to help make your data even more useful.

WHAT WE OFFER

Knowledge really is power. Our sentiment analysis solution will help you fast-track your organisation's ability to discover customer perceptions and insights.

BiTQ's templates allow you to maximise your efficiency immediately. This removes the major cost burden of having to hire someone to design, plan, and develop this capacity for you.

Our templates are designed to allow us to easily integrate our solution with your existing systems and choose the most suitable options. Think of it as a series of LEGO bricks that can be substituted when needed to give you a truly exceptional experience that is customised to your needs.

BiTQ use the latest Microsoft Azure services to provide a cloud-native application, making it simple to use and cost-effective to manage.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
